

ADD A NEW LEVEL OF REALISM TO YOUR ENGAGEMENT SIMULATION SYSTEMS FOR FORCE-ON-FORCE TRAINING WITH MILES PISTOLS AND RIFLES.

DRY FIRE WITH YOUR CARRY FIREARMS:

The 9mm SureStrike™ laser cartridge allows shooters to safely practice use of force scenarios with their own weapons, or non-gun platforms such as Laser Ammo Advanced Training Laser Pistol.

This bullet size SAT fits directly into the chamber of all popular firearm calibers; and is activated by the impact of the firing pin, allowing all of the different drills including holstering with the shooter duty holster.

Our adapter system allows the shooter to adapt the same cartridge to all popular calibers, with minimal costs. Available calibers are: 380, 9mm, 40SW, 45ACP, 10mm, 357sig, 38SP, 44MAG, 45LC, 223 / 5.56 for AR15, 308, 3006, 12G and 20G.

The UhrSecure™ system - is a safety measure that renders the chamber incapable of loading a live round, eliminating the possibility of a live round being loaded during training. The system ensures that the laser is bore sighted ensuring accuracy.

RECOIL ENABLED TRAINING GUN WITH AIRSOFT

Laser Ammo also offers its high-quality laser solutions with Airsoft.

The advantages of using a non-gun (Airsoft) for training:

- Replica weapon, therefore, no need to register with ATF
- Cost effective way to train with a recoil enabled firearms.
- Look and feel of a real weapon
- Fits duty holsters
- Mimic the pistol blow back using green gas or CO2
- In case of weapon failure, it is very easy and inexpensive replace.
- May be painted any color for safety purposes.

PRODUCT SPECIFICATIONS:

- Contains computer microprocessor
- Powered by batteries (2 included with each SAT)
- Stainless steel construction and High-quality glass lens
- No misfires (with real guns)
- Effective laser range out to 50 yards
- Use with all calibers including pistols, shotguns and rifles
- Supports any ESS gear using PMT90 code set
- Pre-programmed for all kill words
- PID programming and calibration device sold separately
- 1-year warranty or 5,000 shots.
- 24/7 Customer service
- 100% Satisfaction guaranteed
- Lead free

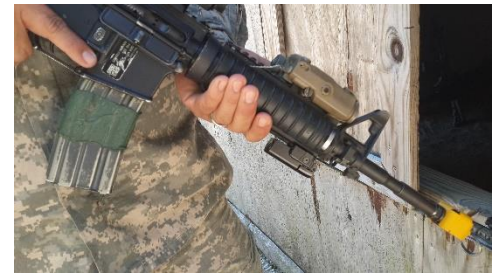

SMALL SAT TO USE WITH BLANKS, UTM'S AND SIMUNITION RECOIL FIREARMS

The Firefly Small Arms Transmitter attaches to the picatinny rail of pistols so equipped. The Firefly is triggered by a blank fired from the pistol, we recommend using Simunitions or UTM converted pistols using their respective blank rounds (non-man marking) to ensure safety during training. The Firefly employs a two IR laser system, one for close in engagements, and the other for longer engagements. Once properly calibrated, the SAT allows for an effective engagement range from 4 to 50 yards when aiming at center mass. The Firefly includes an allen wrench for securing the SAT to the picatinny rail. The Firefly enables shooters to safely practice use of force scenarios with their own weapons, or non-gun platforms such as Airsoft.

Pistols equipped with the Firefly SAT will fit in holsters made to accommodate pistol mounted flashlights.

Our picatinny rail adapter system allows the shooter to adapt the same SAT to all popular pistols or other small arms. The calibration system ensures that the laser is aligned to the sights ensuring accuracy.

PRODUCT SPECIFICATIONS:

- ◆ Narrow or wide beam collimation
- ◆ Triggered by Internal vibration sensor, which is scaled and modified according to the user's platform (Accelerometer IC within the electronic circuit).
- ◆ Supports external dry fire trigger—sold separately.
- ◆ Adjustable elevation and windage
- ◆ Battery: Non-Rechargeable 3V (CR2) or 3.6V (14250)
- ◆ Weight: 2.4 ounces/68 gr (with battery)
- ◆ Material: Aircraft grade aluminum
- ◆ Dimensions: L 64mm (2.52") W 27mm (1.06") H 28mm (1.1")
- ◆ Sleep Mode – allows minimal power consumptions when the device is not in use
- ◆ Supports any ESS gear using PMT90 codeset
- ◆ Fixed PID, can be changed between training sessions
- ◆ Pre-programmed for all kill words
- ◆ Effective laser range 4 - 50 yards
- ◆ Two IR transmitters:
 - ◆ Medium range - IR Laser Emitter.
 - ◆ Close range IR LED Emitter.
- ◆ PID programming and calibration device sold separately
- ◆ 1 year warranty
- ◆ 24/7 Customer service
- ◆ 100% Satisfaction guaranteed
